About Choto

Choto mobile application was founded in the year 2016 and aims to make marketing great and fun. It enables one to watch adverts aired on it and make money from watching.

Choto App does this through offering advertisers an affordable platform for advertising. It exposes their products and services to a wide range of viewers.

On the other hand the viewers who watch adverts on Choto App are able to make money by simply watching adverts to the very end. The viewers are also exposed to a large variety of adverts hence are aware of various products and services offered out there and can be able to engage easily but not blindly during purchase.
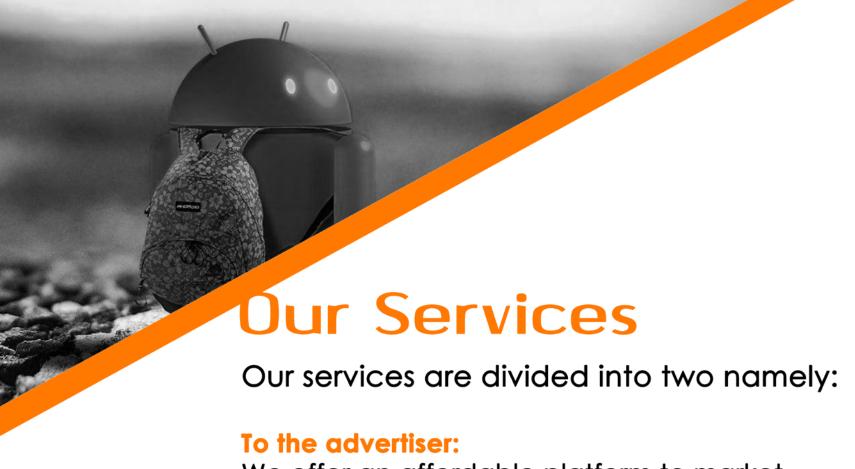

Our Services

Our services are divided into two namely:

To the advertiser:
We offer an affordable platform to market goods and services

To the viewer:
We enable him or her to make money by simply watching adverts aired on Choto App to completion. Watch as many adverts as possible to make more money.
